Philip E. Smith
President
Phil-Tite Enterprises
4770 Caterpillar Road
Redding, CA 96003

#92-9

Dear Mr. Smith:

Approval of Phil-Tite Spill Containers

The model 85000 Containerite spill container made by Phil-Tite has met the requirements for California Air Resources Board (CARB) certification. Our evaluation of this equipment indicated that the operation and durability will be satisfactory.

As required by CARB certification and test procedures, you requested the approval of the Division of Occupational Health and Safety, the Office of the State Fire Marshal, and the Department of Food and Agriculture, Division of Measurement Standards. The necessary approvals have been obtained from these agencies.

I find that use of the Phil-Tite spill container will not adversely affect the performance of gasoline vapor recovery systems. Therefore, the model 85000 Containerite is approved for use with Phase I gasoline vapor recovery systems in California.

If you have any questions, please call Darrell Hawkins at (916) 324-7343 or Laura McKinney at (916) 327-1525.

Sincerely,

James J. Morgester, Chief
Compliance Division
